Human Informed Consent Form

Instructions to the Student Researcher(s): An informed consent/assent/permission form should be developed in consultation with the Adult Sponsor, Designated Supervisor or Qualified Scientist.
This form is used to provide information to the research participant (or parent/guardian) and to document written informed consent, minor assent, and/or parental permission.

- When written documentation is required, the researcher keeps the original, signed form.
- Students may use this sample form or may copy ALL elements of it into a new document.

If the form is serving to document parental permission, a copy of any survey or questionnaire must be attached.

Student Researcher(s): Dhava Rajamanikandan

Title of Project: Measuring Quantization Damage to Tamil Linguistic Performance in Multilingual Language Models

I am asking for your voluntary participation in my science fair project. Please read the following information about the project. If you would like to participate, please sign in the appropriate area below.

Purpose of the project:
This research measures how quantization (reducing the numeric precision of model weights) affects the Tamil-language performance of multilingual AI language models.

If you participate, you will be asked to:
You will review one test case at a time and answer these five questions. The program then shows the next test case that needs feedback:
(1) Is this test case grammatically correct? (2) Does this test case accurately test the features it was meant to test? (3) Is there anything wrong with this test case? (4) Is the correct answer provided actually correct? (5) Could any other answer also be considered correct?

Time required for participation:
About 5 minutes per test case on average. Review as many or as few test cases as you wish - there is no minimum.

Potential Risks of Study:
Minimal risk. The task may cause mild mental fatigue or eye strain. There are no physical, financial, social, or legal risks. You may stop at any time.

Benefits:
Your feedback improves the accuracy and reliability of a Tamil language research benchmark. There is no direct benefit to you beyond supporting this research.

How confidentiality will be maintained:
Your feedback is stored under an anonymous participant code (R1, R2) and is never linked to your name in any result or publication. Completed consent forms are never displayed at the science fair.

If you have any questions about this study, feel free to contact: Dhava Rajamanikandan (dhavarajamanikandan123@gmail.com)

Adult Sponsor/QS/DS: Jay Rosenberg Phone/email: jay.rosenberg@browardschools.com

Voluntary Participation:

Participation in this study is completely voluntary. If you decide not to participate there will not be negative consequences. Please be aware that if you decide to participate, you may stop participating at any time and you may decide not to answer any specific question.

By signing this form I am attesting that I have read and understand the information above and I freely give my consent/assent to participate or permission for my child to participate.
